Trade-marks Journal

2017-04-26 — Vol. 64 No. 3261

Canada

Trade-marks Journal

Vol. 64 No. 3261

General Information

The *Trade-marks Journal* is published every week in compliance with Rule 15 of the *Trade-marks Regulations*. The Registrar of Trade-marks cannot guarantee the accuracy of this publication, nor assume any responsibility for errors or omissions or the consequence of these. All mail relating to trademarks should be addressed to the Registrar of Trade-marks, 50 Victoria Street, Gatineau, Quebec, Canada, K1A 0C9.

Electronic *Trade-marks Journal*

The *Trade-marks Journal* is available in electronic form on the CIPO web site (http://cipo.gc.ca). The *Journal* is available in PDF format and can be downloaded free of charge, viewed and printed with Adobe Acrobat Reader. The electronic form of the *Trade-marks Journal* is the official version.

The *Journal* is also available in a printable HTML format as an alternate official version, and contains a search function to narrow and customize the *Journal* content to user defined areas of interest.

Official Languages

The *Journal* is available in English and in French. The application details are displayed based on the language of the application. If the language of the application is English, the goods, services, or other text and description appearing in the English version of the Journal are in the language filed by the applicant. If the language of the application is French, the goods, services, or other text and description appearing in the English version of the Journal have been translated. Any registration resulting from the application will be restricted to these goods or services described therein.

Filing Dates

The filing date of each trademark application advertised in the *Trade-marks Journal*, including those to extend the statement of goods or services of an existing registration, is shown next to the application number in the sequence of Year, Month and Day.

Nice Classification

The *Journal* includes reference to the Nice classification when the goods or services of an application have been grouped and classed by the applicant in accordance with the current version and edition of the Nice Classification.

Opposition

Any person who has a valid ground of opposition (see section 38 of the *Trade-marks Act* for the grounds of opposition) to any application for registration of a trademark or to any application for registration of a trademark extending the statement of goods or services advertised in this *Trade-marks Journal* may file a statement of opposition with the Registrar of Trade-marks within two months from the date of issue of this publication. The prescribed fee must accompany the statement of opposition.

Goods

Class 09

(1) Optical and electro-optical apparatus and instruments, namely optical sensors, optical scanners, avionics computers, generators of optical signals in the visible band, namely the band of the electromagnetic spectrum that is visible to the human eye, wavelengths visible to the naked eye, infrared, and laser for testing optronic equipment, namely binoculars, thermal imagers, gyro-stabilized drone pods, sighting devices mounted on military aircraft pilot helmets, head-up sighting devices mounted on airplanes, missile guidance systems, missile launch detector systems, in the fields of aeronautics, the military, and space, apparatus and instruments for testing optronic systems, namely binoculars, thermal imagers, gyro-stabilized drone pods, sighting devices mounted on military aircraft pilot helmets, head-up sighting devices mounted on airplanes, missile guidance systems, missile launch detector systems, in the fields of aeronautics, the military, and space; electronic measurement apparatus and instruments, namely altimeters, radiometers, planimeters, and orthoimage samplers, geodesic instruments, tachymeters, goniometers, graphometers, range poles, sights, namely firearm sights, levelling rods, tachographs; automatic control apparatus and instruments used to test electronic and electrical equipment and instrumentation aboard or not aboard aquatic, air, space vehicles, and missiles, namely for testing on-board computers; control apparatus and instruments, namely automatic test benches for testing electronic, electric, and avionic equipment, namely a test system consisting of an optical sensor, optical scanner, avionic computer, and virtual reality software enabling engineers to run tests on the batteries, circuits, wiring, and speedometers of military helicopters and aircraft, military ships, armoured vehicles, trucks, and submarines; computer hardware, namely computers, microprocessors, modems, for connecting test installations via telecommunication media, the Internet, and local communications networks, computer peripherals, namely computer keyboards, computer touch screens and video monitors, digital cameras, computer and optical scanners, printers, mice; software applications for the preparation, conduct of test trials, and for the drafting of test reports for military, land, aquatic, air, and space vehicles and for apparatus for locomotion by land, air, and sea, and for military purposes; optical detectors and sensors; control and testing apparatus and instruments in the fields of aeronautics, space, industry, and transport, namely buildings, including mechanical, hydraulic, electronic installations inside said buildings, for testing military, land, aquatic, air, and space vehicles, and apparatus for locomotion by land, air, and sea, and for military purposes; control and testing apparatus and instruments, namely test benches for wiring, electrical harnesses, electrical wiring, on board or not on board, namely for military and land

vehicles, namely trucks, all-terrain vehicles, armoured vehicles, tanks, air and space vehicles, marine and river surface vehicles, namely ships, submarines, airplanes, spacecraft, satellites, namely through the generation and switching of stimuli and the measurement of stimulus effects, namely aircraft flight simulators; apparatus and instruments for the control and testing of electrical insulation and continuity, namely electrical insulation and continuity test benches; apparatus and instruments for the control and testing of electrical components, namely resistance, namely metal strength testing machines, capacitors, diodes for semiconductors; electric relays; apparatus for the generation of low and high electric voltage, namely programmable power supplies, bidirectional power supplies, precision sources, current generators, electronic loads, electrical current and voltage amplifiers, four-quadrant amplifiers; diagnostic apparatus other than for medical use, namely computer scanners, diagnostic systems, namely on-board electronic and computer diagnostic systems for military, land, aquatic, air, and space vehicles, and missiles, equipped with algorithms for detecting electronic and computer anomalies, used in the aeronautics, military, and space fields; data processing equipment, namely computers, their subassemblies and their constituent parts; central processing units, namely processors for raster images, signals, digital signals, satellite signals, digital voice signals, video processors; computer software for the testing and maintenance of electronic and electric instrumentation systems used on military land vehicles and land vehicles, namely trucks, all-terrain vehicles, armoured vehicles, tanks, airplanes, spacecraft, and missiles, except rail vehicles; remote control devices for engines, namely drones, radio-controlled public works vehicles, firmware for the remote control of computer hardware; electronic display boards; benches, namely automatic control apparatus and instruments for testing electronic, on-board and not on-board, and avionic equipment, namely for testing on-board computers; radio and video transmitters and electric cables for producing test documents; all of the above-mentioned products not being used in relation to maintenance, work, securing, signalling, engineering, expertise, and consulting activities in the field of rail operations.

Class 12

(2) Military vehicles for locomotion by land (except rail vehicles), by air and water, namely military aircraft and helicopters, military ships, armoured vehicles, trucks, and submarines; aeronautical apparatus, machines, namely aircraft, airplanes, helicopters; civil and military air vehicles for transporting people and payloads, namely airplanes; unmanned aerial vehicles and remotely guided vehicles other than toys, namely drones; vertical takeoff and landing aircraft; space vehicles ; all of the above-mentioned products not being used in relation to maintenance, work, safety, signalling, engineering, expertise, and consulting activities in the field of rail operations.

SERVICES

Class 37

(1) Maintenance, repair, and calibration of electronic and electrical systems and instrumentation, computer installations, their peripherals and subassemblies, namely optical sensors, optical scanners, avionics computers, thermal imagers, sighting devices and head-up sighting devices mounted onto airplanes and onto the helmets of military aircraft pilots, missile launch detection and guidance systems, electronic and computer diagnostic devices for on-board computers used in military, land, aquatic, air, and space vehicles, and missiles, computers, microprocessors, modems, computer touch screens and video monitors, printers; all of the above-mentioned services not being used in relation to maintenance, work, securing, signalling, engineering, expertise, and consulting activities in the field of rail operations.

Class 38

(2) Telecommunications and communications through fibre optic networks, namely provision of multiple-user access to a computer network, airtime package services for wireless communications and telecommunications, namely mobile radiotelephony and mobile telephony services, electronic transmission of data, namely text messages, sounds, graphics, and video, namely still and animated images and transmission of information via computer server in the fields of aerospace and computers, namely telecommunications services via fibre optic cables, telephone lines, radio and microwave transmission, and satellite, namely email services; audio and video transmission and communications services, namely video conferencing services; transmission of messages, namely recording, storage, and transmission of voice messages and text messages by telephone, email services; satellite transmission, namely satellite transmission of television signals, satellite transmission of telephone signals; transmission of computerized data and digital files, namely dissemination of information, namely text messages, sounds, graphics, and videos, namely still and animated images in the aerospace field via a computer database; wireless calling services, namely radio, telephone, and other means of electronic communication, namely radiotelephony and mobile telephony services, telephone services offered by means of fibre optic cables, telephone lines, radio and microwave transmission, and satellite; rental of telecommunications apparatus, namely rental of telephones, mobile telephones, facsimile machines, modems; supply, namely transmission of information related to telecommunications by means of an electronic database in the field of computer network security services; telecommunications routing and junction services for the benefit of others, namely connection services enabling access to the Internet and any global computer network; telecommunications routing and junction services; communication through computer terminals, namely email services; electronic display services, namely telecommunications , namely provision of an electronic bulletin board in the field of aerospace; telecommunications connections to a global computer network via Internet, telephone, satellite, email, file transfer protocol (FTP), peer-to-peer networks (P2P); rental of access time to computer networks; rental of access time to telecommunications networks, namely rental of access time to global computer networks; provision of access to electronic databases in the fields of civil security and military defence; provision of online access to computer databases, namely provision of access to websites on the Internet in the fields of civil security and military defence; all of the above-mentioned services not being used in relation to maintenance, work, securing, signalling, engineering, expertise, and consulting activities in the field of rail operations.

Class 41

(3) Publication of digital certificates; educational and training services, namely correspondence school services and remote online e-learning education services, namely organization and conduct of air pilot training workshops, practical training, and lessons; provision of information related to training, namely provision of access to a computer database related to flying lessons; all of the above-mentioned services not being used in relation to maintenance, work, securing, signalling, engineering, expertise, and consulting activities in the field of rail operations.

Class 42

(4) Design and updating of computer software, tests, and maintenance for electronic and electric instrumentation used on military land vehicles (except rail vehicles), marine and river vehicles, airplanes, spacecraft, and missiles; design of computer software for automatic test benches for electronic and avionic equipment; computer programming, production, namely design of computer programs and computer software related to the design, structure, nomenclature, testing, diagnosis of breakdowns and manufacturing defects of electronic and electric apparatus and equipment used on military land vehicles (except rail vehicles), and space vehicles; installation of computer software ; scientific and technological services, as well as related research and development services, and analysis and research services performed by engineers, namely computer engineering services;

assessments, estimates, and research for others in the fields of science and technology, performed by engineers namely in the fields of testing, maintenance, and supervision of military, land, aquatic, air, space vehicles, and missiles; research and development of new products for others, namely research services in the field of communications, namely development and design of secure electronic messaging software, performed by engineers, development of data transmission systems, namely design and development of computers in the fields of testing, maintenance, supervision, in the aeronautics, military, space, industrial, and transport fields; technical control and testing services for military land vehicles (except rail vehicles), aquatic, air, space vehicles, and missiles; all of the above-mentioned services not being used in relation to maintenance, work, securing, signalling, engineering, expertise, and consulting activities in the field of rail operations.
